PROJECTS

Technology Analyst

#1   Client: PG&E corporation

Description:

● PGE internal site to run scheduler to transfer the files from SFTP server to AEM DAM using JSch library and display the files in the page.

● Here to run the scheduler I have used a runnable interface.

● The files transferred should be replicated in both Publish and Preview so I have used the replicate method to publish.

● I am sending error emails when there is an exception in the functionality to solve the issue as soon as possible.

● Workflow for accepting and rejecting the published content

● Servlet using the path to submit a form.

`C` `Java` `Python`

APPLICATION ENVIRONMENT

`Apache and PHP.`

Environment: AEM cloud, Java, sightly, javascript

#2 Client: ABB

Description:
● In the ABB website, we have converted the basic HTML and JavaScript into React.

● For that, we have changed the normal model to model exporter using Jackson exporter and selector as JSON.

● Added validations to component.

● Created a few components as per the requirement.

Environment: AEM, Java, sightly

#3 Client: Chhattisgarh Markfed

Description:
● This is a government project of Chhattisgarh where they assign their paddy to some vehicles and track the vehicle until the paddy reaches procurement centers to millers.

● I have used wialon API to get the tracking details using PHP.

● These details need to be displayed on the website according to there requirements.

Environment: AEM cloud, Java, sightly, javascript

#4 Client: BRISK

Description:
● This project is an interface for employees and employers. Where they can post jobs and employees can apply for a job.

● It is an internal site where I have added a form to fill details of employees and store them in a database.

Environment: Next Js, Laravel API, Mysql
